2016 Top 500 North American Solar Contractors

Solar Power World, the industry's leading source for technology, development and installation news, presents the **2016 Top 500 Solar Contractors list**. The list ranks applicants according to their influence in the industry in 2015.

The list details the location of a company, how many people it employs, its primary market (utility, commercial, residential or off-grid), as well as its primary service (EPC, developer, rooftop contractor, construction firm or electrical subcontractor). Ranks are determined by the number of megawatts a company was involved with installing in 2015. If two companies reported the same 2015 numbers, they were sorted by total megawatts installed.

Solar Power World thanks our 2016 Top Contractors [Advisory Panel](#) and [SolarReviews](#) for their help in verifying installation claims.

Earn up to \$40 back per microinverter – up to \$16,000 in total rebates.

up to **\$16,000**
