

CORE MARKETS

Data Centers: We build mission-critical data centers throughout the U.S. that enable people to connect with one another and access the information they need quickly and securely.

Commercial: Our commercial team of experts design, construct and renovate biotech facilities, corporate campuses, educational institutions, airports, transit systems, water treatment plants and entertainment venues.

Energy (Renewable + Distributed Generation): Our energy team builds projects from the field to the grid. Whether it's a solar, battery energy storage system, substation, EV charging or high-voltage project, our teams deliver when it matters most.

“ I HAVE HAD A STEADY CAREER TRAJECTORY AT CUPERTINO, WORKING THROUGH EACH STEP ALONG THE PROJECT MANAGER DEVELOPMENT PATH...EACH STEP HAS BEEN CHALLENGING AND REWARDING BECAUSE OF THE AMAZING PROJECTS I'VE BEEN LUCKY ENOUGH TO WORK ON. I'VE HAD MANY MENTORS AND CHAMPIONS OF MY SUCCESS ALONG THE WAY WHICH I KNOW HAS CONTRIBUTED TO MY CAREER DEVELOPMENT.

Project Executive Erin Azevedo

ABOUT CEI

Cupertino Electric, Inc. (CEI) is a top U.S. electrical engineering and construction company that is powered by people who have built a reputation for executing high-profile, complex commercial, energy and data center projects. For nearly 70 years, CEI has delivered real, tangible projects that alter landscapes and improve lives. But more importantly, it's built a reputation for integrity.

From the very beginning, CEI's founder, Gene Ravizza, wanted the company to be known—inside and out—as “honest, and fair, and just.” That guiding principle is the soul of CEI, and it runs like a current through every office, every conference room and every jobsite. It makes us who we are. We're problem solvers and innovation seekers. We're team players and safety fanatics.

And we always—ALWAYS—do the right thing. Because what we do is important, but HOW we do it is everything.

WHY CHOOSE CEI?

CEI is a place where every single person can—and does—have an impact on the work we do and the communities we serve. At CEI, you can build your own story and grow to your full potential. You'll collaborate and celebrate with amazing people. And you'll go home knowing that you helped contribute to important work that shapes people's lives.

We believe that:

- It's more than a job, it's an opportunity to learn and grow.
- You should like the people you work with.
- Good work should be rewarded.
- Reputation is everything—and we have a great one.
- We have a responsibility (and the passion) to positively impact the communities where we live and work.

THE MOMENT I LEARNED THAT CEI TAKES THE TIME TO DEVELOP THEIR EMPLOYEES...SOLIDIFIED MY DESIRE TO LAUNCH MY CAREER AT CEI...[ALSO], ALL OF THE VARIOUS MARKET SEGMENTS THAT CEI IS INVOLVED IN OPENS UP ENDLESS OPPORTUNITIES FOR GROWTH AND EXPERIENCE.

Project Engineer James Ziebell
previously interned at CEI

THE BEST PART ABOUT WORKING AT CEI IS THE CAMARADERIE AND UNITY AMONGST THE EMPLOYEES. THE CULTURE WITHIN THE COMPANY PROVIDES A STRONG FOUNDATION FOR COHESION BETWEEN THE DIFFERENT DEPARTMENTS AND JOBSITE TEAMS.

Project Manager Josh Sheneman

NEW GRAD OPPORTUNITIES

At CEI, we have exciting opportunities for recent or soon-to-be graduates in Engineering, Construction Management and related fields. New job seekers can build a successful career foundation with our comprehensive on-the-job learning, problem-solving-based tasks and training specially designed for new grads. CEI currently has mega-project opportunities across the U.S. where we work, including California, Idaho, Illinois, Indiana, Iowa, Missouri, New Mexico, Ohio, Oregon, Utah and Washington.

INTERNSHIP OPPORTUNITIES

Our 10-to-12-week summer program is designed to expose undergraduate and post-graduate students from across the U.S. to real-world construction projects for commercial, data center and energy customers.

Our hands-on program offers participants the unique opportunity to contribute to active projects and make meaningful industry connections. Students who intern at CEI are quickly immersed in the industry with on-the-job office and jobsite training provided by working alongside seasoned veterans and skilled field leaders.
